

is acupuncture for me?

Acupuncture treatment is based on the principles of Oriental Medicine and involves the insertion of hair-thin needles into particular areas of the body along channels or meridians of energy called Qi (pronounced "chee"). The needles are painless, sterile, and disposable.

Thousands of years ago the Chinese discovered that Meridians carrying Qi, which science refers to as bio-electromagnetic energy, flow throughout the entire body, connecting the internal organs to the surface of the body. It is here at the surface that acupuncture points can be stimulated to produce a therapeutic effect internally. Specific points are chosen to manipulate the movement of energy in the body according to the individual's needs.

Dysentery	Nausea	Vomiting
	Osteoarthritis	Wrist Pain

rejuvenate your body, mind and senses

Doreen offers an eclectic blend of acupressure, reflexology, and Chinese Medical Massage (Tui-na), which are highly effective techniques for treating the strains and sprains of sports injuries.

Treatments also include Hot Stone Massage with Aroma Therapy Oils and Chinese Herbal Formulas that are appropriate for different conditions. The heat of the Hot Stone activates the healing and medicinal properties of the oils, releasing them into the body as they massage into tight muscles like a hot knife through butter.

Special formulations of essential oils based on the time-tested principles from Oriental Medicine are included in the Aromatherapy Treatment. Essential oils have therapeutic properties that can treat different types of conditions on the face and the body.

- Stimulates, tones and increases circulation and collagen production.
- Relaxing, soothing and sensual.
- Anti-aging properties to rejuvenate the skin.
- Treatment of cellulite and spider veins on the legs.
- Alleviation of pain, stiffness, muscle spasms, sprains and strains.
- Treats sinus problems and headaches, the face and the body.
